Trip Record

THE BEST RUN **SAP**

Provides a central industry-specific object to capture all trip related data and make it available to trigger demand for subsequent operational processes. By introducing a single generic API for all operational systems, Trip Record dramatically simplifies this process and provides a Single Source of Truth (SSOT) for applications and processes, thus reducing integration effort.

How can Trip Record help you change the game?

Obtaining crucial operational data and analytics from different travel & transportation/airline services and support providers can be challenging, tedious, and can also take up a lot of company time and money. Trip Record offers you a simplified integration to key operational systems.

What are the key features of Trip Record ?

- Single source of truth for operational applications and processes
- Integration of trip data coming from different operations systems in different formats
- Introducing a generic API for all operating systems

- Your operational data as the foundation for deep analytics and cost reduction processes
- Maintenance of a central record for a trip
- Runs on SAP Business Technology Platform (BTP)

Key connectors to industry systems

What are the benefits?

By introducing a single generic API for all operational systems, Trip Record dramatically simplifies the process of capturing operational data and provides a Single Source of Truth (SSOT) for applications and processes, thus reducing integration effort:

- Lower integration effort to bring information from various operations systems
- Eliminating processing overhead
- Eliminating data redundancy by providing a Single source of data for LoB applications

- Exposed trip information for further consumption by operational applications
- Cost-Effective - pay for the cloud resources you consume according to your fleet size and route size
